**DETAILED ACTION**

**Election of Species**

[01] This application contains claims directed to the following patentably distinct species of "specified condition":

[01a] Wherein said specified condition is a total elapsed time of operation of said device, as in claims 4, 21 & 33.

[01b] Wherein said specified condition is reaching a pre-defined period of operation for a current operating session of said device, as in claim 5.

[01c] Wherein said specified condition is a voltage level of a power source in said device, as in claims 6 & 23.

[01d] Wherein said specified condition is a receipt of a command, as in claims 7 & 26.

[01e] Wherein said specified condition is satisfied by a sensor of said device detecting a pre-defined external environment, as in claims 9, 24 & 32.

[01f] Wherein said specified condition is satisfied by a counter exceeding a predefined number of images captured by said device, as in claims 11, 22 & 31.

[01g] Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all

Art Unit: 3739

claims are generic is considered nonresponsive unless accompanied by an election.

[02] Currently, claims 1-3, 8, 10, 12-20, 25 & 27-30 are generic.

[03] Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

[04] Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
